TECHNOLOGIES  
• Products • Solutions • Support

## AV Recording Rooms

A broadcast quality solution that allows presenters and educators to record and create professional quality A.V content.

Data Video broadcast quality components ensure that a flawless & quality video is created by teachers and trainers without the need to master the complexity of technology.

## Training Rooms

H.R. & training departments are constantly exploring best ways to train both internal & external team members.

Explore Data Video solutions for "IN CLASS" & "REMOTE" training modules & sessions. Conduct trainings locally or stream over multiple platforms for external participants.

## Experience Centres

"Expand Experience Centre Reach By Taking It To Your Customers"

Engage with your customers even without them setting a foot into your experience centre. Get more ROI from existing or upcoming experience centres by using Data Video solutions.

Data Video's fast, reliable and high quality cameras, controllers & streaming products combine to create customized solutions for all customers.

## Corporate Video Production

Creating a professional video presentation is something that every corporation nowadays should be doing. Whether it is the annual figures or the latest product launch, corporations rely heavily on video messages to reach out to their target audience.

## Auditoriums & Seminar Rooms

Data Video broadcast quality PTZ cameras and controllers deliver stunning image quality even on large sized projection / LED screens.

The power of single wire, using HDBaseT technology makes it possible to implement the solution in upcoming or existing projects with complete ease of installation.

## Town Hall Meetings

Depend on Data Video to create professional & broadcast quality video where a critical message from company's Chairman / CEO needs to be presented.

Solutions from 3 to 10 cameras, streaming, recording & integration with audio & control systems are available for small to large meetings / events & conferences.
