- ✔ 24x7 work space

CCCCO

High Impact Spaces

Transform your boardroom for smarter collaboration+

Our comprehensive solution for high-impact spaces is built on the award-winning Barco CTRL, a powerful content distribution and management system that integrates everything your leadership team needs. This includes simultaneous monitoring of AV content from video conferencing, collaboration platforms, presentation tools, CCTV feeds, news channels, and Remote Desktop Protocol – all integrated into a powerful unified dashboard that enhances decision-making in high-stake scenarios.

Whether you're in the room or working remotely, the system keeps everyone connected and informed. With simple, scalable, and globally trusted technology, your boardroom evolves from a meeting space into a hub of confident, business-driving decisions. In today's fast-moving, security-sensitive world, such a solution is not just useful—it's essential for any future-ready organization.

Why upgrade to High Impact Spaces solutions?

Traditional boardrooms offer basic screens and limited sharing—often lacking security, flexibility, and real-time insights. Barco transforms your space with live data feeds, cyber-secure architecture, smart collaboration tools, and remote accessibility. It's not just a boardroom upgrade—it's a shift to faster, safer, and smarter decision-making for modern businesses.

1.

Precise with Automatic Alignment

- Uninterrupted viewing experience with NoGap technology without risk of damage and precise alignment.
- Modular, future-proof system, grows with your needs .
- No dark edges, superior intra-tile uniformity.
- Fastest diagnostics and swift servicing.

2.

Redundancy

In-built redundant power supply results in zero downtime of VW and minimises technical interventions.

3.

Auto Calibration

In-built SenseX – automatically calibrates the VW. 24x7 brightness and colour calibrated videowall, thanks to Barco SenseX.

4.

Credibility

Barco –an internationally acclaimed leader in display, collaboration and control room technologies now works jointly with Ceeco Technologies to bring their hard earned expertise to their customers in India.

5.

Boardroom-Plus

Various kinds of content now available for viewing on a common canvas for taking informed decisions and expanded horizon.

6.

Convenience

Senior management can be physically present in the high impact boardroom or can choose to remain in their own space in the same network and can still view, hear and interact with the main boardroom.

- Capture any content once and visualize everywhere.
- Easy sharing and collaboration for faster and better decision making.

■ Simplicity

Although the system is very powerful, it is also simple to set up with a wizard guiding the installer through the configuration process.

■ Scalability

Strictly following the 'Security by design' principles, the platform combines strict cybersecurity with intuitive use.

■ Security

By simply adding additional encoders and decoders, the solution can start small and potentially expand to a global system.

7.

Cybersecurity

For peace of mind – ISO 27001 certified.

- Built on Zero Trust Architecture with Five Pillars of Security in design
- Identity Management
- Communication Protocol
- Media Protection
- System Protection
- Audit Logging
- Data Security is our top priority via end to end encryption (TLS).
- Regular functionality and security enhancements by firmware updates.

HIGH IMPACT SPACES

A strategic environment designed to support critical thinking, fast decision-making, and seamless collaboration.

Simplicity · Scalability · Security

- **Expanding situational awareness**

Inter connected rooms for sharing and collaboration via end to end encryption for faster and effective decision making.

- **Optimizing resources**

Leverage existing infrastructure to enhance security and collaboration, enabling confident decision-making and maintaining a competitive edge.
