

Blue Water Shipping

In 2012 a new domicile for Blue Water Shipping was built. The idea was to create an energy-efficient house without using air-condition etc. The house was installed with a very advanced system called CTS, where sensors both outside and inside control the temperature and windows open and close according to the wind direction.

Furthermore, sun (PIR) sensors control the shading and auto shots if the sunray is too high. The building contains five floors and is divided into 60 zones. Each zone has their own music channel and level control.

All people are situated in an open office environment and therefore 11 conference rooms are installed in different sizes with the possibility of connecting some of the rooms. All conference rooms are fully equipped with HD projector or screens with associated PC, which is hidden in the ceiling.

Each conference room has their own touch panel, which is controlled by the Neets Control – SieRRa. When a room is activated, the light turns on to: “Meeting session”, the extraction and shading starts, the screens turn on along with the amplifier and PC – the conference room is ready for use immediately.

Blue Water Shipping meeting room with Neets Control - SieRRa

All rooms work the same way, no matter what conference room you are using and at the same time – you have access to all of your material online due to the network! Everything is operated with a wireless keyboard and mouse.

The Neets Control – SieRRa in every room is connected to the CTS-system and works as a part of this intelligent room control and makes the whole building being controlled by this intelligent integrated AV system.

Overall, the Neets Control – SieRRa makes is very easy for the end-user to startup a meeting in every room using a touch panel, as the control board makes the solution more flexible.

Neets Control products in the case story:

Neets Control - SieRRa

Controlled with iOS/ Android tablet. Design your own graphical user interface

Neets A/S:

Neets is a privately held Danish company based in Horsens. For more than a decade, Neets has pursued a course of customer-driven development and innovation.

Neets is now Scandinavia's leading supplier of AV control systems, and is known throughout Europe as a forward-looking company with fresh ideas and solid customer support.

Despite our continuing success, we remain focused on a clear goal within a defined market. We concentrate our resources on creating smarter solutions for classrooms, boardrooms and conferencing facilities. Read more about Neets Control Systems on www.neets.dk
